Proudly Made in Britain

Welcome to our brand new state-of-the-art door manufacturing facility, boasting the latest sustainable manufacturing techniques.

With R&D testing, manufacture and support all under one very large roof, IG Doors has the most advanced door manufacturing facility in the UK. Our new factory creates door sets from slab to finished product, with all stages of production contained on a 1km production line. This is overseen by a dedicated production team with over 300 years of experience between them.

As a supplier to the New Build and Social Housing Refurbishment sectors for over 40 years, IG Doors has the resources, flexibility and organisational structure to cope with the requirements of major National House Builders and Developers, Local Authorities and Social Housing Landlords.

This ensures our door range is not only manufactured to the highest levels of quality but also delivered on-time to your project.

40 years of experience

Supplying new build and social housing refurbishments

Dedicated support

From a knowledgeable & experienced team, based in the UK

Fully Accredited

Meets ISO 9001 / ISO 14001 / ISO 45001 / ISO 50001 & Kitemark standards

All Doors Carbon Neutral Certified As Standard

Our dedication to climate action extends further; all our doors are offered as standard CO₂-neutral products. This means that every door you choose contributes to a more sustainable and eco-friendly environment.

Collaborating with ClimatePartner, we've proudly attained CO₂-neutral certification—a testament to our unwavering commitment to sustainability. This certification is more than a stamp; it transparently signifies our dedication to combating climate change. Through the meticulous three-step process of calculation, reduction, and compensation, we proudly present our Carbon Neutral products.

This not only reflects our pledge to environmental responsibility but also assures our commitment to ongoing evolution for a greener future.

Calculation

Annually, we calculate our corporate carbon footprint, using the 3 scopes. This assessment spans manufacturing processes and product life-cycles, guiding our sustainability strategy to pinpoint emission sources and identify improvement areas.

Reduction

We reduce our emissions wherever possible. This means we are taking various steps, big and small, to reduce our carbon footprint. We think that the reduction or direct avoidance of emissions is the most sustainable way.

Compensation

Offsetting our remaining CO₂ emissions involves certified climate protection projects such as the Verified Carbon Standard (VCS). This strategic approach positions our products as inherently CO₂ neutral, contributing to our sustainability commitment.

Pioneering Sustainable Solutions

We recognise our duty to future generations and have championed sustainability for years. Our strategy revolves around calculation, reduction, and compensation, aiming for a carbon-neutral footprint.

Unveiling Our Carbon Footprint

Every year, we meticulously calculate IG Doors' CO₂ emissions across all three scopes of the Greenhouse Gas Protocol. This approach covers facility management, mobility, office supplies, and logistics, alongside packaging and input materials. This comprehensive assessment underpins our sustainability strategy, helping us pinpoint emission sources and identify areas for improvement.

Understanding our environmental impact empowers us to implement targeted measures for meaningful reductions in our carbon footprint. Through continuous refinement, we minimize our environmental footprint and contribute to a more sustainable future.

Sustainable Choices, Big and Small

As an SWS registered member, IG Doors upholds packaging waste standards, opting for cardboard over plastic and increasing recycling efforts to minimise waste. We reduce emissions through various initiatives, prioritising sustainability in every aspect of our operations.

Holding ISO 50001 energy management certification, we lay the groundwork for effective energy management while adhering to ISO 9001 and 14001 standards to ensure quality and environmental responsibility. Through these measures, we continuously strive to reduce our carbon footprint and promote sustainable practices across our operations.

Offset and Innovate

Expanding on our climate action efforts, IG Doors offsets remaining CO₂ emissions through certified climate protection projects, such as those accredited under the Verified Carbon Standard (VCS). This strategic approach enables us to offer CO₂-neutral products, a testament to our dedication to sustainability.

By supporting verified climate projects in third-world countries, we not only compensate for residual emissions but also contribute to global climate action, driving positive environmental impact and promoting a greener future. This enables us to offer CO₂-neutral products.

Tailored Services for Every Entrance

For more than four decades, IG Doors has served as a trusted supplier to the new build and social housing refurbishment sectors, demonstrating an unwavering commitment to quality and meticulous attention to detail.

Boasting one of the most extensive production capacities in the UK, we cater to both new build and refurbishment projects. Our resources, flexibility, and well-organised structure uniquely position us to meet the demands of major national house builders, developers, as well as local authorities and social housing landlords.

Quotation

IG Doors initiates your journey towards the perfect door by gaining a comprehensive understanding of your unique needs and preferences. Our team of experts are dedicated to assessing your requirements, delivering tailored solutions, and providing you with a detailed, complimentary quotation.

Supply Only

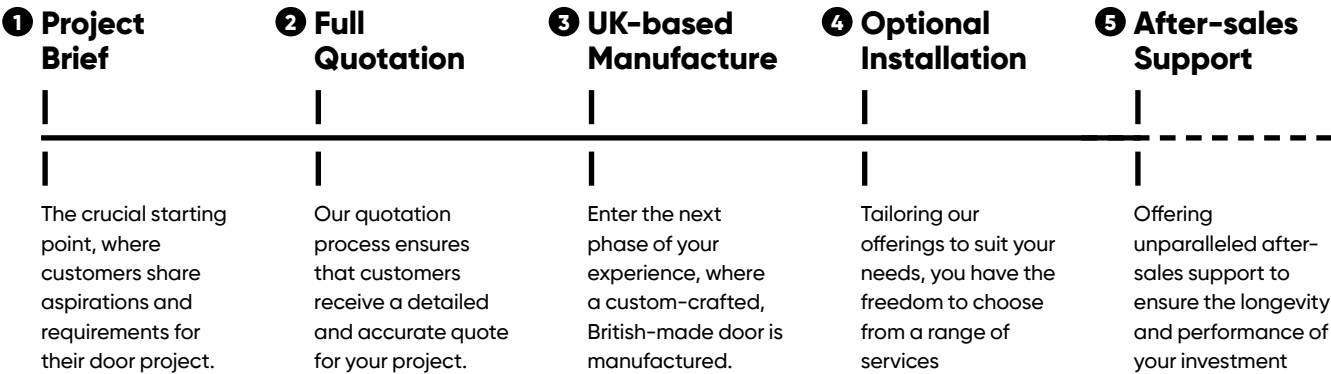

Experience the freedom of our Supply Only service, offering you the flexibility to take control and oversee the installation process. Be confident that our doors come with meticulous fitting instructions and comprehensive support, ensuring a smooth and efficient installation experience.

Supply & Install

Guiding you through the selection of the ideal door to seamlessly installing it, our all-encompassing Supply & Install service guarantees a hassle-free experience for your project. With a team of skilled professionals managing both aspects, we alleviate the usual effort and time associated with the installation process.

Total Management

Select our Total Contract Account Management service for a worry-free experience from start to finish. Our team handles every aspect of your door project, ensuring a seamless process and offering you a dedicated point of contact for all your needs; from the initial consultation through to the final installation.

Uncompromising Fire Protection

Experience unrivalled fire protection with IG Doors' **Ignis30** Fire door range. Designed to meet the highest standards and certifications, our fire doors provide robust solutions for both house-builders and refurbishment projects.

With IG Doors' **Ignis30** Fire door range, you can ensure the safety and security of your spaces without compromising on style or performance. Our fire doors are meticulously crafted to meet ISO 9001, ISO 14001, ISO 45001, and Kitemark standards, providing you with peace of mind. Independently tested at a UKAS accredited fire laboratory, our Q Marked fire rated doors surpass the 30-minute fire integrity resistance required by regulations.

Available in a range of sizes to meet Approved Document M, our fire doors offer durability, excellent sound insulation, and thermal performance. Whether you choose the primed option for on-site painting or the pre-finished door, you can expect a high-quality product that does not warp, bow, or split.

Robust Certification

Thoroughly tested and certified by the BM TRADA Q-Mark Scheme, our **Ignis30** Fire doors provide the ultimate peace of mind and assurance of their exceptional fire performance.

Exceptional Performance

Ignis30 Fire doors have been rigorously tested to achieve over 30 minutes of fire integrity resistance according to EN 1634-1 standards.

Versatile Design Options

Choose from three distinct external styles and two internal styles, including glazing options, allowing you to customise your **Ignis30** Fire doors to complement the aesthetic of your space.

Compliant and Secure

Meeting the stringent PAS24 security standards, **Ignis30** Fire doors provide peace of mind of enhanced security, keeping spaces safe and secure.

Security as Standard.

IG Doors' Secured by Design certified doorsets offer enhanced building security with a high-security multipoint locking system, tested against drilling, picking, and crowbar assaults.

IG Doors combines style, robustness, and certified security with our carbon-neutral door solutions. Our doors adhere to the rigorous standards of Secured by Design and feature a high-security multipoint locking system, providing superior protection. Additionally, our Kinetica 3-star cylinders, accredited by Secured by Design, offer advanced security features and come with a £4,000 Anti-Burglary Guarantee*. With IG Doors, you can have peace of mind knowing that your entrance is stylish, sustainable, and secured against intrusions.

Security you can trust

When it comes to security, our door ranges are truly exceptional. Each door is equipped with a high-security multipoint locking system that meets the rigorous standards of PAS 23/24 and is tested in accordance with BS EN ISO 1303 Building Hardware – Cylinders for Locks.

In addition to robust locking systems, our doors come standard with laminated glass and a security glazing cassette, enhancing your property's security measures. Furthermore, the inclusion of the TS008 secure letterplate with restricted opening provides an added layer of protection against key fishing and lock manipulation.

£4,000 Anti-Burglary Guarantee*

Experience peace of mind with our exclusive £4,000 Anti-Burglary Guarantee. Our doors are equipped with the UAP Kinetica Kitemarked high-security 3 Star Cylinder, approved by Secured by Design.

This advanced cylinder has been meticulously designed and tested to withstand attacks from the outside while ensuring that it can still be easily opened from the inside. Rest assured that your door will remain secure, safe to use, and function flawlessly for you and your family.

Enhanced Features

Our IG Doors range offers unparalleled security features for your peace of mind. With a high-security stainless steel multi-point locking system, and toughened safety glass to BS EN 12600, our doors are designed to keep you safe.

The steel reinforced frame adds extra strength, and the optional split spindle mechanism offers customizable locking configurations. Trust IG Doors for uncompromising security.

Secured by Design.

Secured by Design is a leading crime prevention initiative that emphasises the importance of physical security in buildings to deter criminal activity and reduce crime.

Working closely with manufacturers, the construction industry, and standards authorities, SBD ensures that security standards remain up-to-date and effective against emerging crime trends.

IG Doors proudly adheres to the principles of Secured by Design, offering doors that meet the highest security standards. Our products undergo rigorous testing and certification by independent third-party bodies accredited by the United Kingdom Accreditation Service (UKAS).

By choosing IG Doors, you benefit from doors that have been tested, certified, and proven to exceed the recommended security standards. Our commitment to Secured by Design certification provides enhanced protection and peace of mind for your home or property. Trust in IG Doors for secure and reliable solutions that prioritise your security.

Range features:

- Meets PAS24:2016 Certification for enhanced security
- Independent third-party certification via BSI Kitemark Scheme
- 3 Star Security as Standard, meeting Document Q requirements
- Laminated glass & Security glazing cassette
- Thick GRP door skins passing security cutting tests
- High Security Letterplate, door chain, & eye viewer
- Secure bolt-through furniture
- Electric lock options available
- Steel reinforced PVCu frames
- Suitable for communal entrance doors
- Sidelight options available

Secure Communal Entrance Doors

Enhance security and control with our GRP communal entrance doors. Designed for multi-occupancy developments, these durable doors offer attractive designs and robust access control solutions. They are compatible with mechanical and electronic locking systems, providing a reliable solution for secure access. Choose from 'open in' or 'open out' applications, with optional electronic multipoint locks for enhanced functionality. Trust in our overhead door closers for self-closing convenience and adjustable speed.

Range features:

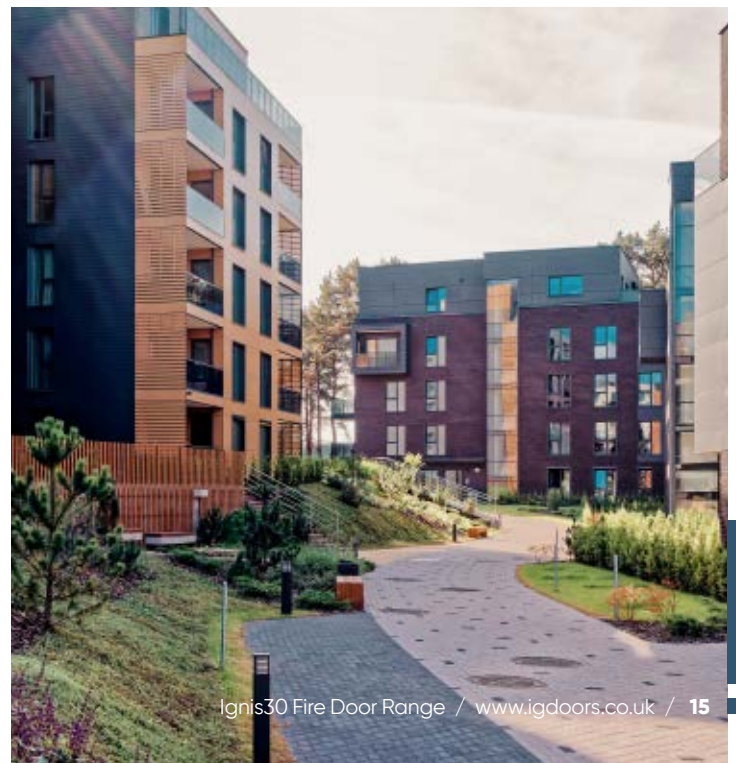

- Doors available for 'open in' or 'open out' applications
- Master keying and suiting options for common entrances
- Optional electronic multipoint lock for enhanced security
- Frames offered in softwood and PVCu materials
- Frame designs include fanlights and sidelights
- Optional ironmongery items: Kick plates, Key/thumb-turn cylinder

Door Closers:

- Overhead type self-closing device
- Suitable for 'open in' and 'open out' applications
- Minimum power size EN3 compliant with BS EN 1154:1997
- Suitable for doors up to 950mm wide and 60kg maximum
- Adjustable closing speed and latch action
- Custom closing devices available upon request

Standard Electronic Multipoint Lock:

Introducing our standard Electronic Multipoint Lock, a cutting-edge solution for enhanced security. This advanced lock can be seamlessly integrated with your access control system, ensuring utmost convenience and peace of mind. It comes ready for on-site wiring by a qualified electrician, adhering to the security standards set by Approved Document Q.

Finishes

304 Stainless Steel door hardware:
corrosion-resistant and stylish finishes for
enhanced door appeal.

Elevate your door's functionality and style with our door knockers, lever handles, letterplates, security chains, and numerals, all expertly crafted from 304 stainless steel. This high grade material ensures ultimate corrosion resistance, while our selection of brushed, gold, brushed gold, polished, matt black and granite stainless finishes perfectly complement your door's colour. We stand by our quality with a two-year finish guarantee.

- ❶ **Brushed Stainless**
- ❷ **Polished Stainless**
- ❸ **Gold Stainless**
- ❹ **Brushed Gold Stainless**
- ❺ **Granite Stainless**
- ❻ **Matt Black Stainless**

Knockers & Viewers

Stainless steel door knockers and eye
viewers: stylish choices for secure,
welcoming entrances.

Upgrade your entrance with our stainless steel door knockers, available in traditional and contemporary designs. Crafted from durable 304 stainless steel, they come in Gold stainless, Brushed Gold, Polished Stainless, Brushed Stainless, Matt Black Stainless, and Granite Stainless finishes to perfectly complement our wide range of 35 door colours.

For added security and convenience, our brass eye viewers are available in matching finishes, allowing homeowners to easily identify visitors at their door. Enhance your door's functionality and style while ensuring a warm and secure welcome to your home.

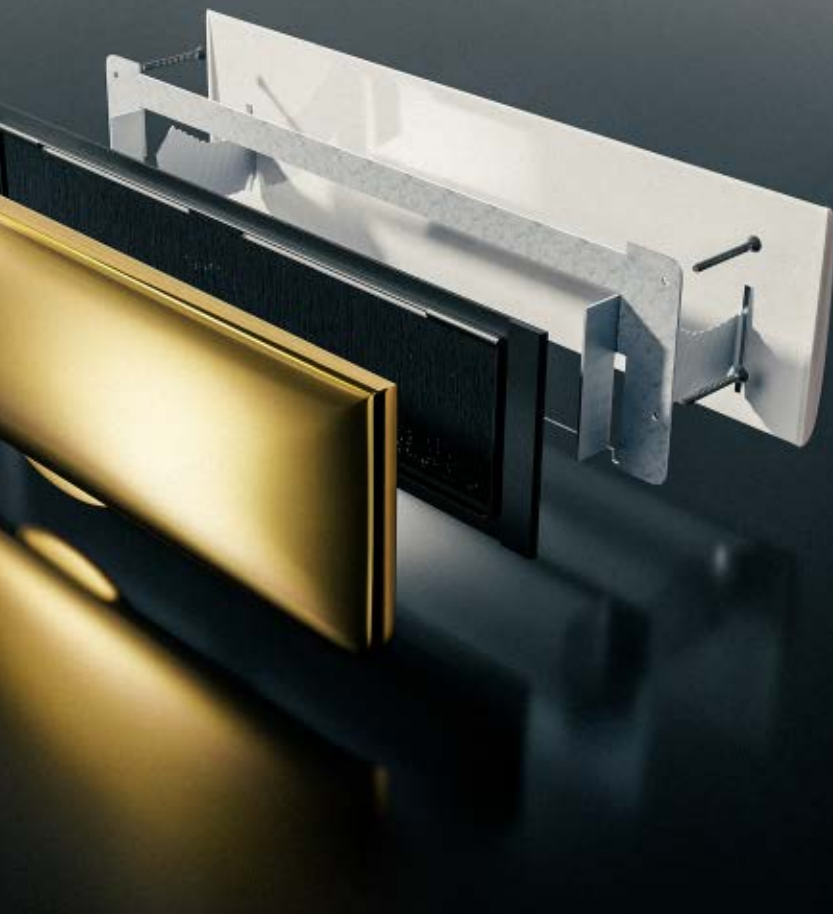

Letterplate

Elevate security and style with our discreet 12-inch letterplate, ensuring a seamless door operation and an unobtrusive, sleek design.

With a minimal 14mm internal flap projection, our 12-inch letterplate seamlessly aligns with the door's hinge-to-handle line, allowing unrestricted door opening without damaging interior walls. Its frameless design enhances a door's appeal, standing out among TS008 letterplates. This award-winning, security-compliant letterplate combines slim elegance with powerful features.

- Secured by Design Police Preferred Specification and BSI Kitemarked.
- Restricted opening to protect against key fishing and lock manipulation.
- Cycle tested to 20,000 cycles.
- Designed for 44mm – 63mm composite doors.
- Document Q and PAS 24:2016 compliant.
- Installer Awards Winner 2023 – Glass and Glazing

Cylinders

High-security lock cylinders: Reliable access control and ultimate peace of mind.

Our lock cylinders, engineered for security and convenience, offer precision and peace of mind for your property.

With options for Key-Key or Key-Thumbturn, they boast over 100,000 key combinations and come in brushed, polished and gold finishes.

The Kinetica Kitemarked high-security 3-Star Cylinder, approved by Secured by Design, has been meticulously designed and tested to withstand external attacks while ensuring easy access from within. Elevate your property's security with our advanced lock cylinders.

Support for Years to come

We are committed to providing you with complete peace of mind when you choose a new door for your property.

Our priority is to ensure that you receive the highest level of service and care for your door, so that you can enjoy your doors without any worries for many years to come.

Our team of fully trained technical engineers take great pride in every door-set produced in our factory and are trusted to guarantee that nothing leaves our premises without meeting strict quality criteria and undergoing thorough testing. In the unlikely event that you encounter a problem, you can rest assured that our customer care team and insurance-backed comprehensive guarantee will provide you with the necessary support.

With our resources, flexibility and organisational structure, we are well equipped to meet the requirements of major national house builders, developers, local authorities and social housing landlords. Our dedicated customer care team is always available to assist you with whatever you need.
